如何从外观上进行鉴别  
国套、省套和常规套胶？

红双喜对国套省套和普通套胶在外形上有严格区分。国套是正方形四个角，省套会截去正方形上部两个角，也就变成市场上通常所说的6角，普通套胶会截去正方形4个角，也就是变成8角。

## 狂飚3 [反胶IN] HURRICANE 3

### 持久粘性、弧圈相持

### Increased tackiness suitable for loop drive

自2000年以来，狂飚3成为大部分中国运动员的不二之选。对于追求控球和弧圈质量的选手来说，即使用中等发力，也能毫不费力地打出强烈旋转和较长的弧线，不仅在中远台，在近台也能发挥快攻和弧圈的威力。狂飚3，粘性更持久，增强40+新材料乒乓球的旋转。

Hurricane 3, with increased tackiness, is suitable for loop drive. Hurricane 3 has been the best choice for almost all the Chinese players since 2000. Hurricane 3 is designed for players who pursue the quality of ball control or have relatively weak attack. The rubber can boost power and produce long arcs, which improves the ball control and exerts fast attack and loop drive close-to-table. Hurricane 3 with increased tackiness, enhances the spin of 40+ Celluloid-Free T.T. balls..

狂飚3出色的粘性，能通过表面摩擦制造中远台变化丰富、线路低沉的弧线；50号海绵充沛的弹性，让使用者手腕发力也能产生强烈旋转。狂飚3-50无疑是“摩擦”、“撞击”两种旋转相结合大法的最佳选择。狂飚3-50细腻的控制手感，轻松发力就能打出乒乓球穿越的力量，粘性胶皮和高弹海绵的独特组合，弧圈进攻更快、更稳定。

Hurricane 3 is a tacky rubber which produces a characteristic low arcing ball flight from middle-far distance. The 50# sponge featuring great elasticity enables strong top-spin when players hitting with wrists.

As the combinatin of tacky rubber and elastic sponge, Hurricane 3-50 is the first choice for players who prefer drive-loop and topspin. The sponge can realize delicate reactions to balls while the rubber grips and holds the balls through friction. Such a combination provides the player with great ball feeling with every shot and suits players who want to exert a fast, stable loop attack.

## 狂飚8-80 [反胶IN] HURRICANE 8-80

国家队使用，柔弹高粘性胶皮+高弹海绵

Elastic high-stickiness rubber + high elastic sponge

平衡速度与控制的胶皮，搭配高弹的80号大孔径海绵，更为通透的手感，让人快速上手，突出的速度感，恰到好处的控制，又保持狂飚系列独特的黏性和旋转性能。狂飚8-80，更轻、更弹，正反手皆宜的粘性套胶，适合40+乒乓球。

The rubber keeps a good balance between speed and control. The new 80# high-elasticity sponge provides solid hand feel and offensive effect with a short break-in period. Maintaining unique spin of Hurricane Series, Hurricane 8-80 can achieve excellent speed and elasticity under small and medium power. Hurricane 8-80, lighter and more resilient, is suitable for forehand and backhand use, designed for 40+ T.T balls.

## 狂飚8 [反胶IN] HURRICANE 8

Elastic high-stickiness rubber + dense sponge

速度/弧圈 Speed/Loop
厚度/Thickness 2.15/2.2mm
硬度/Hardness 39/40/41

韧性和弹性平衡的胶皮配方，中小力量也有高速度；“新型致密性海绵”+“高弹粒子渗透技术”，比传统海绵增加弹性。这款套胶既保留了狂飚系独有的旋转性能和诡异弧线，又显著增加出球速度，发力通透性令人耳目一新。狂飚8，专为增强40+新材料乒乓球的旋转和速度而设计。

The rubber keeps a good balance between flexibility and elasticity. A new high-density sponge with 'MACRO-CELL' & 'High-Elasticity Particle Osmosis technology' helps Hurricane 8 raise the elasticity by 15%. The player can also acquire a high shot speed with weak attack. Hurricane 8 provides unique spin and unpredictable arc and enhances shot speed significantly, which brings a refreshing feeling for offensive players. Hurricane 8 is specially designed to enhance the spin and speed of 40+ Celluloid-Free T.T. balls.

## 狂飚2 [反胶IN]

HURRICANE 2

### 一击制胜、力量超群

#### Decisive blows with outstanding power

快攻/弧圈  
Quick-Attack/Loop

自2000年王励勤夺冠以来，狂飚2力大势沉的风格保持至今。出球速度之快、旋转之强，无出其右，还能保持良好的控球性。台内球弧线低，令对手难以组织起有效进攻。全新狂飚2，粘性更持久，强化40+新材料乒乓球的旋转。

厚度/Thickness  
2.15/2.2mm

Hurricane 2 is known for its decisive blows with outstanding power. Hurricane 2 has kept the powerful style since Wang liqin won the Championship in 2000. Hurricane 2 can create higher speed and varied spin while maintaining stable control. In addition, it generates strong near-table offensive power to make the ball fly in a low arc which frustrates opponent's defences. Exclusive Hurricane 2, with increased tackiness, enhances the spin of 40+ Celluloid-Free T.T. balls.
